

Heritage Partnerships Program in Colorado

The National Park Service is about more than just parks. The Heritage Partnerships Program of the NPS Intermountain Region helps community groups, local, state and federal agencies, tribal governments, nonprofits, and individuals identify, recognize and preserve national treasures that are located outside of our system of national parks.

The Heritage Partnerships Program (HPP) offers a wide range of services that can be tailored to meet the needs of an individual project. NPS professional staff includes historians, historical architects, and archeologists who assist project leaders in the preservation of our Nation's most significant places. HPP helps communities and groups identify nationally significant resources; prepare National Historic Landmark (NHL) nominations and historical reports; conduct archeological and architectural surveys; complete treatment plans for stabilization and repair; and create planning and education materials.

HPP comprises several programs, including the National Historic Landmarks; Historic American Buildings Survey (HABS), Historic American Engineering Record (HAER), and Historic American Landscapes Survey (HALS) documentation programs; the National Heritage Areas Program; Historic Surplus Property Program; and the Japanese American Confinement Sites Grant Program. In 2016, HPP supported a variety of projects in Colorado, including:

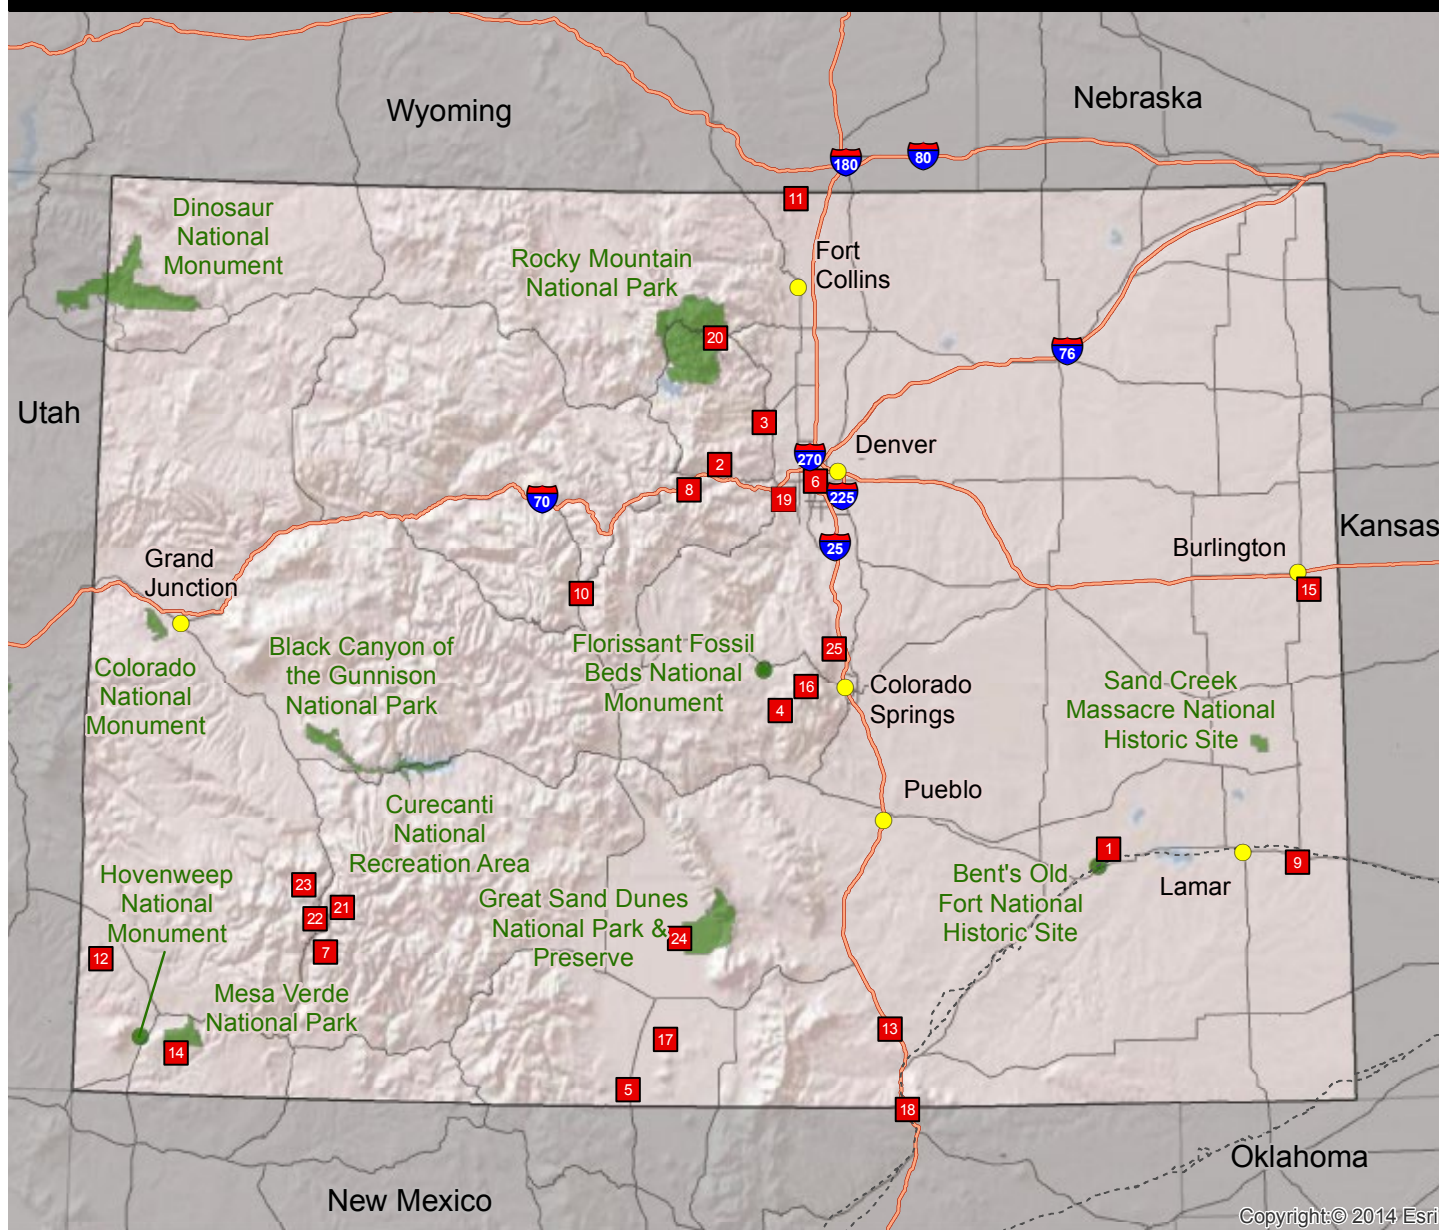

- **Amache 3D Digital Documentation Grant, Prowers County** – with a Japanese American Confinement Sites grant, the University of Colorado Denver's Center for Preservation Research will use LiDAR scanning technology to produce a 3D digital model of the existing landscape, structures, and site features at Amache, as well as 3D images of buildings that were removed from the site.
- **NHL Plaque Dedication Ceremony for Red Rocks Park and Mount Morrison CCC Camp NHL, Jefferson County** – participated in the dedication ceremony for the NHL, which was held in conjunction with Red Rocks Amphitheatre's 75th Anniversary celebration. The NHL nomination was completed in partnership with the City of Denver and Friends of Red Rocks.
- **9th Annual National Get Outdoors Day, Denver County** – participated in the community event, which hosted nearly 7,000 people and fostered a sense of connection between the NPS mission and stewardship of America's treasured places. HPP shared an archeology activity that asked children to connect artifacts to the state's NHLs.
